Diamond-coated

- Coated with minute diamond particles
- Less contact pressure needed for screwdriving
- Dramatically reduced danger of slipping
- Less screwdriving tip and screw head
- Safer screwdriving on sensitive surfaces
- Quicker fastening times
- Easily recognisable with their bright gold colour

Diamond-coated

One of the greatest problems with screwdriver applications is that the conventional screwdriver easily slips out of the head of the screw (cam-out). This often destroys both the head of the screw and the tool. High resulting costs are incurred e.g. from damaged surfaces and screw connections that can no longer be loosened. Screwdriving will become safer and more economic if the problem of slipping can be solved.

INDUSTRIAL QULITY

Durable CRV Steel
Rust resistant and durable

Flexible Knuri
Flexible adjustment
without stuck

Laser Marking
SAE and metric scales

Hanging Hole
Easy to hang

Ergonomic TPR Handles
Offer a comfortable grip

HEAVY DUTY DESIGN

12 POINT BOX END
15-degree offset creates clearance
for hand or obstructions
in tight work spaces

These box ends have 12-point WaveDrive which transfers torque uniformly and prevents damaging and rounding of the bolt.
